Massive improvements to the seminary this month! The building is now completely wired. Lights, ceiling fans, and places to charge electronics abound. Solar system tripled and WiFi expanded. New walls added upstairs to complete the transformation of the second floor to all classrooms and the first floor for offices, library and dorm rooms.

This herculean effort was accomplished by working together. A team from the US and employing a Haitian crew (daily payroll sheet on left) we pulled it off.

Fifteen men had a great paying job for over a week. Thank you partners for your contributions that made this a reality. The men were so happy to earn income. The crew pictured are all men of the church and were becoming more skilled as they worked alongside our US team instruction. We are thankful we can equip our brothers with skills to further their job training. Also, some of the men are seminary students. Pretty cool!

## Powering Ministry

Multiple US churches have have combined efforts to bring generated power to the seminary. The seminary building is wired and this brand new generator (pictured) is supplying all the power needed to meet the needs of the all the students.

Lights for late night studying and the computer lab, plenty of power!!!

## Seminary Campus

Training leaders within the church is a core initiative for THM. This mission team Palmcroft Church served at multiple locations within the Haiti ministry. Leaders taught seminary students through the book of Acts, (students moved outside away from all the construction noise inside) others accessed the computer needs of the seminar and came up with a network plan moving forward, some provided health care in two separate church locations and the rest worked on the seminary.

*Serving* together *under* and *for* the Glory of God!!!
