Brian & Malisa Ellis – Serving with Cru

Change Boston

Summer Snapshots

For this month, we wanted to send you a quick “Polaroid Prayer Letter”. Here’s 6 snapshots of summer for you. Hopefully it gives you a glimpse of the impact you’re having on campus in Boston and beyond. Thanks for joining us in ministry and prayer.

Loving our adventurous Lord,

Brian & Malisa

Summer allows for time with **Julianna** who is finishing up her degree at WIT. Twice a week we have these little moments of discipleship: talking about job hunting, trusting God, & looking forward with expectation. Would you join me in praying for Julianna’s next step?

What a joy to get some extra time with **Kristen, Fiona, Esther, Camillah** during our Monday night Summer Cru gathering. I snapped this photo of us as we were wrapping up a conversation about Ephesians chapter 1.

Most Wednesday mornings this summer I gather with **Iris, Bryana, and Sharon** at Boston University and we all have a little study session together. One is working on coding, one is working on studying for the MCAT, one is working on post graduate school plans I’m working on a New Testament class. It’s been a delightful way to do life with these women.

June has allowed for some great gifts. Slower schedules have opened up for more lingering at the dinner table, more early morning cups of coffee in the our backyard, and more spontaneous time with our family and students. We are thankful for the change of pace this past month.

One of our greatest joys is sending students well into whatever God is calling them towards after graduation. Dinner with a recent graduate around our table was filled with stories of God working this past year while she served Him overseas. Thanks for being part of building the Kingdom of God around the world with us.

We have shared in the past about **Luke and Sam**. Sam who just graduated has not only been a great friend to Luke but he has faithfully discipled Him as well. So as Brian discipled Sam, Sam discipled Luke, and we are praying that Luke would continue that Legacy this next two years of college.
